- Online Games

About Me

As a B.Tech (Computer Science and Engineering) student with a passion for software engineering, I have developed a strong foundation in programming language such as Python and Java. I am proficient in web development with skills in HTML, CSS, JavaScript. Additionally, I have hands-on experience with SQL databases. I am eager to apply my knowledge and skills to real-world projects, and I am committed to continuously improving and expanding my expertise in software development.

Projects

Title: Online Campus Recruitment Training
2022

- The mini project aims to raise awareness about online campus recruitment training, providing students with essential skills and resources to prepare for job opportunities and enhance their chances of securing employment.
- Developed the project using HTML,CSS and Javascript to create a responsive web interface

Title: Soil Contamination
2023

- The mini project focuses on raising awareness about soil contamination, highlighting its impact and encouraging sustainable practices for a healthier environment.
- Utilized HTML,CSS,Javascript and Bootstrap to build a modern,mobile-first website with user friendly layout and interactive features.

Internships

PaloAlto Networks (Virtual)
2024

Company specializing in cybersecurity solutions
Participated in a team project and gained experience in cybersecurity

Genz Educate Wing (Virtual)
2024

I successfully completed a web development internship at Gen Educate Wings, where I acquired practical skills in HTML, CSS, JavaScript, and frameworks. Awarded a certificate for proficiency, showcasing dedication and growth

Elewayte(Virtual)
2025

I completed a Python internship at Elewayte. I learned the basics of Python, wrote programs, solved errors, and built simple projects. It really improved my Python skills and confidence.
